Mary Holder,  
Superintendent/Principal

Annette Towell,  
Administrator Assistant

May 21, 2024

Dear Manes R-V Parents,

All lead testing has been completed and the results have been received by the district. The firm St. John Environmental Consulting, LLC from St. Louis, MO was contracted to collect the water samples. Eurofins Eaton Analytical South Bend, South Bend IN completed the analysis of the samples.

The Get the Lead Out of School Drinking Water Act requires that school building water sources contain a lead content of less than 5ppb. The analytical test results show all samples taken at Manes R-V School meet all requirements of being below 5ppb. The Manes R-V School District will not be required to conduct lead testing again for a five (5) year period.

The District is proud that our water system and delivery has been found to be safe for our students.

If you have additional questions, please contact Mary Holder at 417-668-5313 or [mholder@manes.k12.mo.us](mailto:mholder@manes.k12.mo.us).

Additional information and resources on the health effects of lead contamination are available here:

<https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water#health>

Thank you,

Mary Holder  
Superintendent  
Manes R-V School District
